SUBJECT INDEX - Volume 23

Abrus precatorius L., isolation of 5β-cholanic acid from, 357
Absorption, of corticosteroids from lung, 617
17α-Acetoxy-6-11β-dichloro-19-norpregna-4,6-dien-3,20-dione, biological profile of, 425
3β-Acetoxy-5β-ergosta-7,22-dien-6-one, configuration of, 579
Acetylation rates, of 12α-hydroxy steroids, 895
Acridine orange, uptake after steroid administration, 517
Adrenal Cortex, 21-hydroxylation of steroids in, 185
Aldosterone,
    determination of in plasma, 809
    radioimmunoassay of, 741
Allo bile acid, dehydrogenation of with Raney nickel, 221
5α-pregna-3,20-dione, genetic regulation of, 499
Aminoglutethimide, effects on testicular steroidogenesis, 165
Androgen,
    binding to SHBG in man, 833
    metabolism of in kidney, 793
Androgen receptors, in rat testis, 823
Androgens, metabolism of *in vitro*, 397
Androst-4-en-3-one-17β-ol,
    prostate metabolism of, 291
    radioimmunoassay of, 699
Androst-5-en-17-one-3β-ol sulfate, formation of in fetal adrenals, 145
Antibodies, for aldosterone, 741
Anti-estrogen sera, specificity studies of, 549
Antiserum to pregn-4-en-3,20-dione-17α-ol, specificity of, 49
Anti-testosterone sera, specificity studies of, 699

Breast carcinoma, steroid metabolism in, 379
Bone mineral mobilization, in nephrectomized and thyroparathyroidectomized rats, 75
5β-Cholanic Acid, occurrence in plants, 357

Cholesta-5,7-dien-1α,3β-diol, synthesis of, 75
Cholesta-1,5-dien-3β-ol, synthesis of, introduction of 1α- or 2α-hydroxyl group to, 75
Cholestan-5-ols, from photosensitized isomerization-hydration of 5-cholestene, 259
Cholest-5-ene, photosensitized isomerization-hydration of, 259
Cholesterol,
    in testis, 165
    role of esters in steroidogenesis, 165
Contraceptive activity, 425
Corticosteroid secretion, rhesus fetal and maternal adrenals, 229
Corticosteroids,
    assay of in isolated rat adrenals, 443
    pulmonary absorption, 617

Corticosterone, radioimmunoassay of, 363
Cortisol,
  metabolism of, 311
  metabolism of in lung, 845
  uptake and release, in red blood cells, 35
Cortisone, metabolism of in lung, 845
Cytochrome P450, 21-hydroxylation of steroids, 185

DMBA induced rat carcinoma, steroid metabolism in, 379
Danazol, interference with specific progesterone protein binding assay, 411
Deuteration, of aromatic steroids, 731
Dihydrotestosterone, radioimmunoassay of, 757

Ecdysones, high-pressure liquid-solid chromatography of, 507
Electrolyte solutions, cortisol uptake in by red blood cells, 35
Epididymis, metabolic conversion of ^{3}H-testosterone *in vitro*, 397
Episodic corticosterone secretion, 363
2α,3α-Epithio-5α-androstan-17β-yl 1-methoxycyclopentyl ether, as an orally active anti-estrogen, 929
Estradiol, receptors for in brain, 773
Estradiol-17β,
  brain metabolism of, 469
  radioimmunoassay of in serum, 535
  -^{3}H, in rabbit uterus, 879
Estradiol-2-hydroxy-4-^{14}C, metabolism of, 65
Estra-1,3,5(10)-trien-3,17β-diol, effect on phosphofructokinase, 105
Estriol, in dogs, 667
Estriol-3,16-disulfate, biosynthesis of by guinea pig liver, 301
Estrogen, effect of on uterine receptor, 93
Estrogens,
  metabolism of, 869
  radioimmunoassay of, 549
  2-substituted, gas chromatography-mass spectrometry of, 17
Estrogen synthesis, in cow follicles, 337
Estrone,
  brain metabolism of, 469
  3-deoxy-4-^{14}C, preparation of, 731
  3-deoxy-3-deutero, preparation of, 731
  ^{3}H, in rabbit uterus, 879
  radioimmunoassay of in serum, 535
Estrone sulfate, plasma levels in pregnant ewes, 855
Ethinylestradiol, preparation of in high specific radioactivity, 155
Ethyl alcohol, effect of on plasma testosterone, 921
17α-Ethynyl-estra-1,3,5(10)-trien
  -3,17β-diol-6-[O-carboxymethyl] oxime, in radioimmunoassay, 173
  -6-one-3,17β-diol, in radioimmunoassay, 173
  -2,3,17β-triol, in radioimmunoassay, 173
  -3,6α,17β-triol, in radioimmunoassay, 173
17α-Ethynyl-2-methoxyestra-1,3,5(10)-trien-3,17β-diol, in radioimmunoassay, 173
17α-Ethynyl-3-methoxyestra-1,3,5(10)-trien-6α,17β-diol, in radioimmunoassay, 173

STEROIDS

17α-Ethynyl-3-methoxyestra-1,3,5(10)-trien-17β-ol-6-[O-carboxymethyl] oxime, in radioimmunoassay, 173
17α-Ethynyl-6-oxo-3-methoxyestra-1,3,5(10)-trien-17β-ol, in radioimmunoassay, 173
Excretion patterns, of 17α-hydroxycorticosteroids, 455

Fetal adrenals,
    ACTH-induced biosynthetic pathways, 639
    metabolism of steroid sulfates in, 145
Follicles, biosynthesis of estrogens in, 337

Gas chromatography,
    differention of sterols, 687
    -mass spectrometry, of 2-substituted estrogens, 17
Glucose 6-phosphate dehydrogenase, of rat liver and adrenal, 133
Granulosa cells, biosynthesis of estrogen, 337

Hormone-gene interactions, 499
3β-Hydroxy-15α-carboxymethyl-androst-5-en-17-one, preparation of, 483
17β-Hydroxy-1α-carboxymethyl-androst-5-en-3-one, preparation of, 483
17α-Hydroxycorticosteroid, excretion of measured by gas chromatography, 455
2-Hydroxyestradiol 2,3-methylene ether, preparation of, 869
2-Hydroxyestrone 2,3-methylene ether, preparation of, 869
3β-Hydroxy-17-oxo-androst-5-en-7-one 7-(O-carboxymethyl) oxime, preparation of, 483
11β-Hydroxyprogesterone, corticosterone precursor, 639
3β-Hydroxysteroid oxidoreductase, in rat ventral prostate, 291
1α-Hydroxyvitamin D_3, synthesis and biological activity of, 75

Immunoassay, of steroids, preparation of steroid-protein antigens, 203
Intestinal calcium transport, in nephrectomized and thyroparathyroidectomized rats, 75

Jequirity Bean seeds, isolation of 5β-cholanic acid from, 357

3-keto-reductase, activity of in mouse kidney, 793
6-keto-Δ^7-steroids, An NMR technique for C-5 configuration of, 579

Lung, corticosteroid absorption from, 617
Lysosomal enzyme levels after steroid administration, 517

Macaca mulatta, during pregnancy, 269
Marine sterols, from gorgonians, 421
Mating,
    genetic regulation of, 499
    progestin control of, 499
Medrogestone (Colprone®), assay of in plasma, 561
Medroxyprogesterone acetate, radioimmunoassay of, 713

Mestranol, preparation of in high specific radioactivity, 155
Metabolism,
of androgens *in vitro*, 397
of cortisone and cortisol by the fetal rabbit lung, 845
2-Methoxyestrone, metabolism of, 869
Methyl 3β,7β-Dihydroxy-5α-cholanate, synthesis of, 221

NMR technique, for C-5 configurations, 579

Phosphofructokinase, variations of activity by estrogens, 105
Photosensitized isomerization-hydration of cholest-5-ene, 259
Placenta, corticosteroid transfer and metabolism, 229
Plasma estrone sulfate, in ewes around parturition, 855
Pregn-4-en-3,20 dione,
concentration of in serum of androgenized female rat, 203
effect of on uterine receptor, 93
-11β,17α,21-triol fetal-maternal production, metabolism, and transfer in the rhesus, 229
-11β,17α,21-triol, metabolism of, 311
Pregn-4-en-3-one-20α-ol, in pregnancy, 269
Pregn-4-en-3-one-20β-ol, in pregnancy, 269
17α-Pregn-4-en-20-yno [2,3-d]isoxazol-17-ol, measurement of in plasma, 411
Pregnenolone-17α-^{3}H, synthesis and study of, 603
Progesterone,
genetic regulation of, 499
metabolism of, 651
metabolism of in rat uterus, 117
-17α-^{3}H, synthesis and study of, 603
Progestogen, receptor for, 909
Prostate, androgen binding to SHBG in b.p.h. and carcinoma, 833

Radioimmunoassay,
for estrone sulfate in plasma, 855
for serum 11-deoxy-17-ketosteroids, 245
of aldosterone, 741
of aldosterone in plasma, 809
of estrogens, 549
of estrogens in serum, 535
of human plasma corticosterone, 363
of medroxyprogesterone acetate, 713
of mestranol and ethinylestradiol, 155
of plasma testosterone, 625
of progesterone, 323
of testosterone, 699
of testosterone and dihydrotestosterone simultaneously, 757
Raney nickel, Hydrogenation-dehydrogenation in the formation of bile acids, 221
Receptors of progestogen and estrogen, 909
Red blood cells, cortisol release and uptake in, 35
5α-Reductase, activity of in mouse kidney, 793
Δ^{4}-5α-Reductase, of cortisone in rat liver, 133
Rhesus fetal adrenal, steroidogenesis, 639

Sex hormone binding globulin, binding of testosterone and 5α-dihydrotestosterone to, 833
Shielding, by the bile acid side chain, 895
Side chain conformation, in steroids, 895
Silastic implants, for the study of cortisol, 311
Solid phase radioimmunoassay of plasma aldosterone, 809
Spermatogenesis, in rat, 823
Steroid-antigen, formation of, 203
Steroid conjugates, selective 3-carboxymethyl oxime synthesis, 49
Steroid metabolism,
    in fetal adrenals, 145
    (C-19), in human and rat tumors, 379
Steroid receptors, assay method for, 773
Steroid substrate specificity, 185
Steroid sulfates, in testes of man and boar, 1
Steroidal 3-enamines, conversion to 3-carboxymethyl oximes, 49
Steroidal-3-(N-pyrrolidyl)enamines,
    infra-red spectroscopy of, 49
    synthesis of, 49
Steroidal-3-(O-carboxymethyl)oximes,
    infra-red spectroscopy of, 49
    nuclear magnetic resonance of, 49
    synthesis of, 49
Steroid-6-carboxymethyl protein conjugates, preparation of, 323
Sterols, differentiation of by GLC, 687
11β-Substituted steroids, progestational and anti-estrogenic potencies, 585

Testis,
    androgen receptors in, 823
    cholesterol in, 165
    steroid metabolism in, 1
Testosterone (androst-4-en-3-one-17β-ol), formation of in testis, 1
Testosterone,
    concentration of in plasma and effect of ethyl alcohol on, 921
    radioimmunoassay of, 757
    radioimmunoassay of in plasma, 625
    radioimmunoassay of in rat plasma, 165
Theca cells, biosynthesis of estrogen, 337
3,5,3'-triiodothyronine, induction of cortisone Δ^4-5α-reductase and glucose 6-phosphate dehydrogenase, 133

Uterine receptor, regulation of *in vivo*, 93
Uterus,
    effect of estradiol on metabolism of progesterone, 117
    estradiol-17β-^{3}H, and estrone-^{3}H in rabbit uterus, 879
    receptors for progestogen and estrogen in rabbit, 909
